

## Telehealth Resources

Congratulations to APTA staff and members (like you!) who reached out to your legislators to advocate for modification of the requirements for providing telehealth! It is very important for therapists providing these services to review the information on the link below and follow CMS' requirements, in part, so we can demonstrate responsible use and efficacy of telehealth. Appropriate execution on our part could lead to legislative support for **permanent adoption**. APTA has resources describing eligibility, HIPAA, billing/coding and other recommendations here:

<http://www.apta.org/PTinMotion/News/2020/4/30/CMSOpensTelehealth/>

While the CMS press release indicates that hospital outpatient departments are eligible to provide remote services for registered outpatients, APTA staff has contacted CMS for clarification.

For information regarding commercial insurers and occupational medicine, APTA had assembled lists by state for members to review.
